TRPHD Rolls Out Pool Inspection Service

Kearney- TRPHD is excited to announce a completely free and voluntary new service to residents in our district. Two Rivers Public Health Department now has the certification and capabilities to inspect private home pools completely free. TRPHD employees ensure a properly maintained pool to prevent spread of waterborne disease and create a healthy space for exercise and wellness.

What they will do: An overall inspection of the safety of your pool, including testing chemicals and making recommendations to improve physical safety. They will be testing the water for these things:

- Calcium Hardness
- Chlorine level
- Cyanuric Acid Leves
- pH Level
- Total Alkalinity
- Total Bromine

Further education will be provided on these chemicals and their levels at the inspection.

Why: pool safety is important to prevent drowning, chemical injuries, and other safety hazards. Ultimately, the reason they will be testing the water quality of your pool is for health and safety. They will ensure your pool's water is safe to swim in for prolonged periods – too many or too few swimming pool chemicals can both compromise the water's hygiene and safety.

You can call, visit our website: trphd.ne.gov, or scan the QR code below to register your pool for inspection!

Two Rivers Public Health's regular office hours are 8:00 a.m. to 4:30 p.m. Monday through Friday. The office can be contacted at 888-669-7154.

ABOUT TWO RIVERS PUBLIC HEALTH DEPARTMENT

Two Rivers Public Health Department engages collaborative partners, community leaders and the public to promote healthy lifestyles, provide preventative education, assure environmental quality, and create more healthy and safe communities for all who live within the district.
